

TECHNICAL GUIDE

ADOBE COMMERCE MARKETPLACER CONNECTOR

Marketplacer is a global technology SaaS platform equipped with all the tools and feature-rich marketplace functionality needed to build your business a successful and scalable online marketplace, at speed.

MARKETPLACER[™]

The Adobe Commerce Connector allows you to connect an existing Adobe Commerce solution to the Marketplacer platform utilizing a headless configuration.

MARKETPLACER/ ADOBE COMMERCE SETUP PROCESS

1 MARKETPLACER ACCOUNT

If you don't already have a Marketplacer account, get in touch with the Marketplacer team for a [demo](#).

2 TECHNICAL SCOPING

Prior to installation, a Marketplacer Solutions Consultant will conduct a Technical Scoping Workshop to define how your Marketplacer to Adobe Commerce integrations will work. Outputs from this session includes:

- System architecture
- Integration specification to determine the integrations and how these will work

3 FRONTEND DESIGN

Our module is compatible with the default Luma theme. If you have a custom theme or a Luma theme with interface customizations, then you will need to work with a Adobe Commerce Certified Developer or 3rd party to introduce the concept of the "seller" to your existing page templates.

You will need to make User Interface changes to your existing Adobe Commerce theme to introduce the concept of a "seller" to your category list, search results, product details, shopping cart and checkout.

4 MARKETPLACER CONFIGURATION

Your Marketplacer Customer Success team will be able to support you in generating an API key and configuring your Marketplace.

5 MARKETPLACER CONNECTOR INSTALLATION, SETUP AND CONFIGURATION

Installation and setup of the Marketplacer Connector is best completed by a Adobe Commerce Certified Developer or 3rd party that is familiar with installing and configuring Adobe Commerce modules.

6 TEST & DEPLOY

Your Marketplacer Customer Success team will work with you on a quality assurance test plan to ensure your Marketplacer to Adobe Commerce integration functions as expected prior to full deployment and going live.

PREREQUISITES

1 The Adobe Commerce Marketplacer Connector is a module compatible with Adobe Commerce v2.4.x and greater.

2 Our module is compatible with the Adobe Commerce Starter and Pro editions.

3 The Connector is not compatible with Magento 1, Magento 2 Open Source or Magento 2 Commerce OnPrem.

4 Our module is compatible with the default Luma theme. If you have a custom theme or a Luma theme with interface customizations then you will need to work with a Adobe Commerce Certified Developer or 3rd party to introduce the concept of the "seller" to your existing page templates.

5 We highly recommend you install the extension to a fully deployed Staging environment and always work in the development branch.

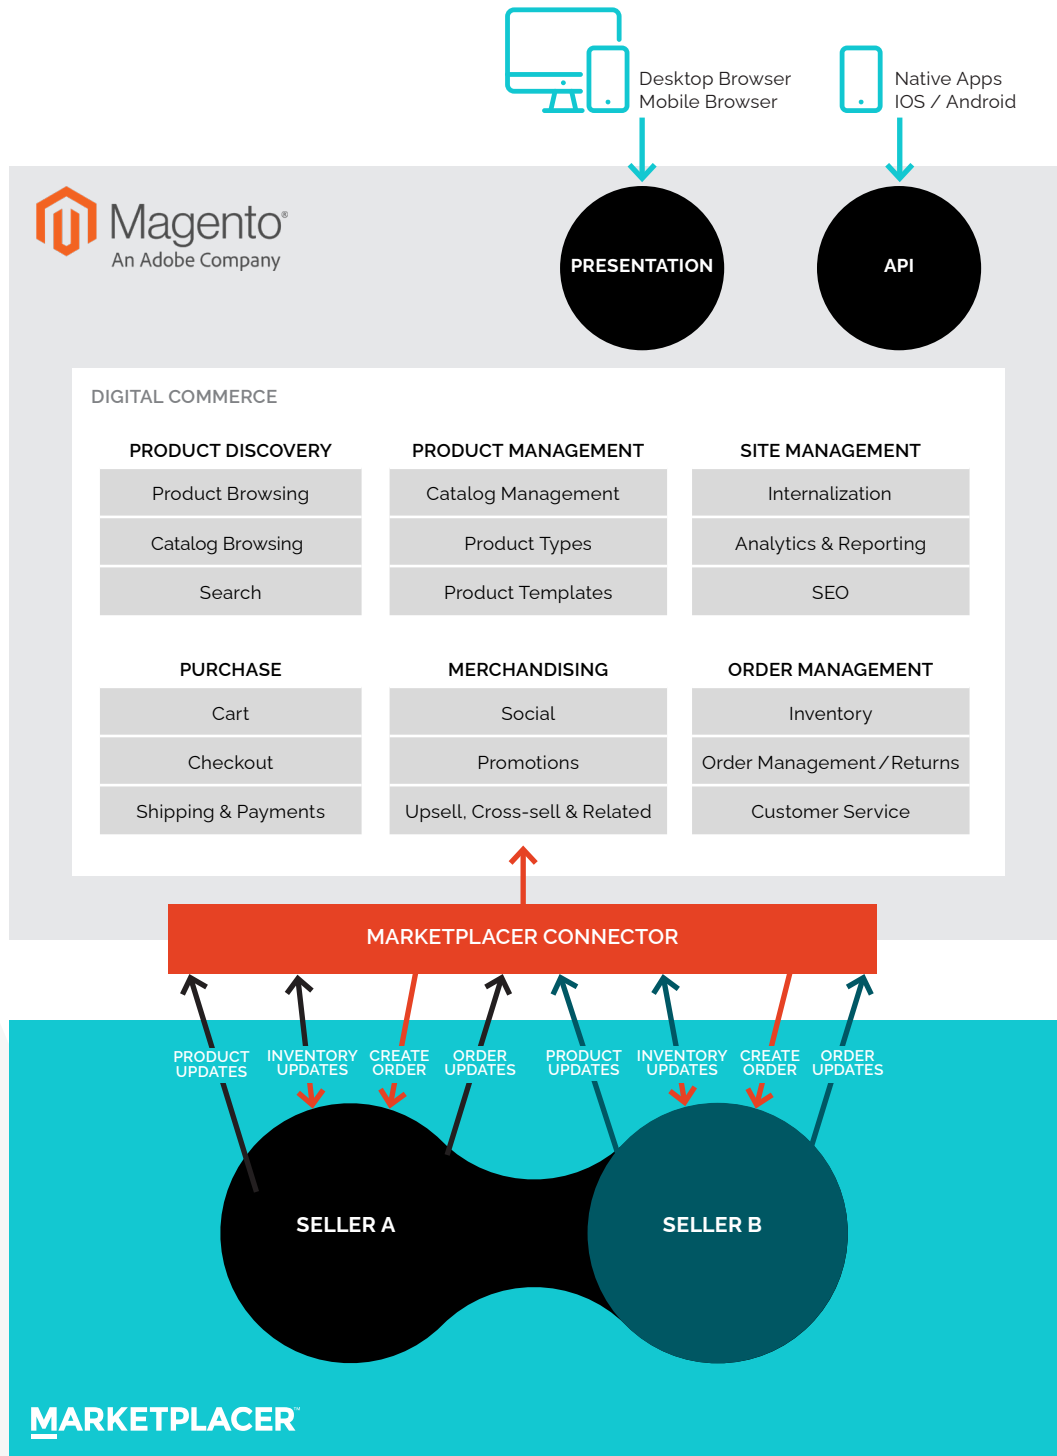

6 Ensure you work with a Adobe Commerce Certified Developer or 3rd party that is familiar with installing and configuring Adobe Commerce modules.

7 You will need to log in to the Adobe Marketplace with the username and password you used to purchase the module

ADDITIONAL NOTES

- The Adobe Commerce Marketplacer Connector module can be installed via Composer within minutes.
- Installation and setup are best completed by a Adobe Commerce Certified Developer or 3rd party that is familiar with installing and configuring Adobe Commerce modules.
- You or your nominated 3rd party is responsible for the installation and setup.
- Support is available via support.marketplacer.com
